

In Our Students' Words

Stacey Heller
CSC Class of 2005

"I am constantly amazed at the relationship between what I learned in my courses at Chadron State and what I do each day. Every day, in my position as Early Head Start Coordinator, I use the principles learned in my Family and Consumer Sciences courses. I am so thankful to be working in a profession that values families and strives to enhance their quality of life."

Holly LaRue
CSC Class of 2008

"Studying Family and Consumer Sciences contributes greatly to personal growth and is very practical. I love it because I know that all I am learning in class applies to my everyday life as well as my career."

Family and Consumer Sciences

INTRODUCTION

"Compassion, commitment, caring." These words are often used to describe professionals in Human Services.

Individuals who are sensitive to the needs of special populations (children, at-risk youth, adults with challenges, the elderly) will find rewarding careers in the Human Services field. Internships are completed at a variety of locations, including social services agencies, retirement centers, youth homes, nursing homes, Head Start agencies, summer camps.
