*Subject to approval by the Nebraska State College System Board of Trustees

A Place to Gather

Commencement ceremonies.
Basketball. Volleyball. Swimming.
Entertainment Events. Exhibitions.
Conventions. Workshops. Speeches.

For Chadron State College these events and more take on great importance. Because of Chadron's location, Chadron State's events and programming bring large segments of the campus and the regional community together on a regular basis. These academic, social and athletic events strengthen relationships and build "community" among students, faculty, staff and residents of the region.

However, decades of other priorities have left Chadron State College with no true events center. The current facility, the 23,000 square foot Ross Armstrong Physical Education Building, cannot adequately accommodate current events and programming, let alone expansion of activities.

A "Keystone Facility" for a New Century

"Keystone facility" is a phrase used to describe a building that holds together or addresses the needs of many constituencies. For Chadron State College, the events center is a keystone facility.

Designed to handle multiple College activities and needs, the events center will in its own way serve as a keystone of campus and community life. Academic, athletic and social events at Chadron State and for the region will prosper for decades to come in the events center, which - at its heart - will have a 2,900 seat arena.

The arena will host large events like commencement, basketball, volleyball, concerts, conventions and exhibitions. This venue will be available for workshops, lectures and other academic programming. The events center will also house the strength and conditioning facilities, sports medicine and the College's athletic department.

New Construction & Renovation

The 117,000 square foot events center will be the product of major new construction and renovation of the Ross Armstrong Building which was built in 1965. The events center will be constructed just off the east end-zone of the Don Beebe Stadium. The resulting facility will be a dramatic new fixture on the Chadron State campus.

Events Center

The Nebraska Coordinating Commission for Postsecondary Education has formally approved the program statement for the new facility for Chadron State College. The program statement has been forwarded to the Nebraska Legislature making the project eligible for State funding of \$11 million of the \$13 million facility if Chadron State College can secure \$2 million in private donations.

"Vision 2011: A Comprehensive Campaign for Chadron State's Second Century" serves to secure these gifts and pledges for this project.
