

# Health Professions

## Health Professions Day October 5, 2011

Each year **Chadron State College** hosts an informative health career day for students interested in learning how they can become a health care provider. Faculty and staff from the University of Nebraska Medical Center, along with local health care professionals, will present sessions on different health care occupations, including RHOP—the Rural Health Opportunities Program. These sessions will cover the responsibilities and opportunities of the occupation as well as the curriculum required to obtain a degree for the health care profession.

Participants are given the opportunity to attend two different sessions. Our hope is to provide students the knowledge necessary to make wise decisions about the career they intend to pursue in the health care field.

Again this year! Health Modules ~ students will have the opportunity for hands-on learning, including blood-typing and sutures.

### Agenda
